Northwest Diesel Industry Council

The Northwest Diesel Industry Council, consists of educational and business leaders, working to develop educational and training programs that expose young people to the rewarding and self-fulfilling opportunities of careers in diesel technology industry.

Committed to Education

Through grants, scholarships and financial-aid the NDIC and its members are working to insure that the work demands of the 21st century are met with a skilled and highly trained workforce. Heavy Equipment And Transport Technology offers a challenging and rewarding career, that can begin with a relatively small investment of money and 24 months of curriculum.

Who Qualifies

The Applicant must be a senior in high school, a recent high school graduate, or have received his or her GED. The applicant must have a grade point average of at least 2.5 for the year immediately prior to application, or for his or her last completed year of school.

Scholarship Size

Scholarship of \$1,000 will be awarded to a student entering or enrolled at any of NDIC participating colleges in the Diesel Service Technology Program. The scholarship is to be applied towards tuition and will be reimbursed to the student upon showing a paid receipt.

How to Apply

Complete the application and agreement on the reverse side, and mail it to the address below. Be sure to complete the entire form, including references, school transcripts and personal statements.
